

GAP PLANT & TOOL HIRE

NEW TRADE DEPOT, SHEFFIELD

PROJECT DETAIL:

Design and construction of a steel portal framed trade depot with 2 storey office facility extending to circa 800sq.m, including associated external works and hard standing / car parking facilities as well as M&E services.

Building footprint required vibro compaction and a 120sq.m attenuation tank was also installed below the ground. A gabion retaining wall was also constructed along the length of the building adjacent to the road.

VALUE: £950,000

PROGRAMME: 28 Weeks

Engineer: DCF Design

CDMC: Alexander Project Management
