

STEWART BREWING

LOANHEAD, MIDLOTHIAN

PROJECT DETAIL:

New Brewing Production Facility

Design and construction of a 500 sq.m steel portal framed industrial building with composite roof and wall cladding, roller shutter doors, personnel doors, associated M&E services and external works / hard standing.

Building footprint required vibro compaction.

Structure frame designed to allow future extensions to be easily added onto building.

VALUE: £500,000

PROGRAMME: 20 Weeks
