**Subject:** Re: BCF Technology Fit-Out - Strathclyde Business Park

Hi Wesley

So sorry for late reply, its just been so hectic – on holiday now – only time to catch up !!

Please find our reference below:

At BCF we were delighted with the fit out project by BBP for our new home at Strathclyde Business Park, the collaboration and attention to our requirements throughout the project were great. The project team kept us fully informed of progress and were also incredibly accommodating of our own comings and goings.

The project was finished on time, on budget and to the high standard we anticipated – a rarity in project management success. Any deviations or unforeseen changes were dealt with professionally and without fuss. The team at BBP were always conscious of what we were looking to achieve – a high quality finish but within a set budget, to this end George and Steve's recommendations actually created a net saving across the project rather than increases!

On behalf of our team please extend our thanks and appreciation to both George and Steve who always communicated well and were a pleasure to work with.

Kind regards

Alan
