Dear Stuart

FTV PROCLAD, GLENROTHES
FIRE DAMAGE REINSTATEMENT WORKS

I write in connection with the recently completed fire damage reinstatement works at the above property and would like to take the opportunity to thank you and your staff's efforts on the project. From the commercial team down to site level, this project was a success. Both the quality of work undertaken and the financial information provided ensured that the project ran smoothly and within the Contract Programme. The levels of communication was ideal for this project and keeping all parties well appraised of the works as they evolved was essential.

The project itself, was very challenging given that the building required extensive structural and cladding repairs undertaken whilst the factory remained operational during the autumn/winter seasons. The biggest compliment that can be given comes from the tenant themselves who stated that their operations were largely unaffected by the Contract Works.

We look forward to further developing our relationship with Bell Building Projects on a wide range of projects.

Kind Regards

Gary Lyle, BSc (Hons) MRICS
