Dear Stuart

**FISHERS SERVICES, PERTH**  
**FIRE DAMAGE REINSTATEMENT WORKS**

I write with regard to the recently completed fire damage reinstatement works at the above property and would like to take the opportunity to thank Bell Building Projects for being involved in a very successful project. Both the quality of work undertaken and the financial information provided ensured that the project ran smoothly and within the Contract Programme.

The project itself, was very challenging given that the building required extensive cladding repairs undertaken whilst the factory remained operational during the autumn/winter seasons. Other than a shift change, the client remarked that they were largely unaware of the ongoing works which is a testament to the co-ordination of the Contract Works.

We look forward to further developing our relationship with Bell Building Projects in the near future.

Kind Regards

Gary Lyle, BSc (Hons) MRICS
