

KING GEORGE V TANK

East Camperdown, Dundee

PROJECT DETAIL:

Fire Damage Reinstatement Works to the Stormwater Tank in Dundee which forms a major component of the Tay Wastewater Project. GRP Cladding Panels and the soffit panel were reinstated along with the Control Room Roof. Vermin prevention measures were also put in place

The tank is embedded in the landscape by means of sculptured berms whilst rooftop plant is concealed behind louvres and a lightweight canopy. It's massive character within the area made this a challenging and interesting project to be involved with.

VALUE: £523k

DURATION: 24 Weeks

PM: Catchment
