

To Whom It May Concern

Stirling Audi – Car Showroom Extension & New Pre Delivery Inspection Building

I refer to recent works carried out to the existing Audi Showroom in Stirling and also the new PDI Building on an adjacent site.

Both projects were completed successfully, not only in terms of timescale, cost and quality but to the satisfaction of the local dealership team who continued trading through the duration of the works. Both projects provide modern facilities in line with the Audi corporate specification to enable Lookers to continue to deliver an excellent service to our clients in Stirling. In particular your site team work closely with the local dealership team to provide suitable temporary office and car storage facilities during the course of the works.

I would have no hesitation in using Bell Building Projects for future car showroom related project or recommending them to other companies undertaking building projects.

There would be no issue should anyone wish to contact me personally to enquire further.

Yours Faithfully

Allen McDonough
