Dear Stuart

PHASE 1
PATONS MILL RETAIL PARK, JOHNSTONE

I refer to the above retail warehouse and drive thru project which we are currently working on with Bell Building Projects Ltd.

The design and build project has been undertaken in a professional manner, within budget and to our overall satisfaction. The already pre-let development provides a modern facility for our occupiers who shall bring many positive aspects to the local area including brands who have no representation currently in the town.

Of particular benefit to us, in the appointment of Bell Building Projects, was the design and build expertise and value engineering ability offered at an early stage from their key personnel and their continued flexible and professional approach in what has been a challenging project.

I would have no hesitation in using bell Building Projects again or recommending them to other companies seeking to undertake building projects.

Yours sincerely

Claire Donaldson
